

An intuitive, high-performance next-generation Sasumata

CERBERUS® security product

SB224

Ultra-lightweight

Approximately **950 g**

National Police Agency **Award Winner**

Newly developed multi-functional head delivers superior performance. Ultra light and easy to manoeuvre.

*Compared to our Sasumata models.

Deter

Head

Rotate the head to move it closer or farther from the face, keeping intruders at a safe distance.

Create a window of opportunity

⚠ Team up for safety.

Thrust and push

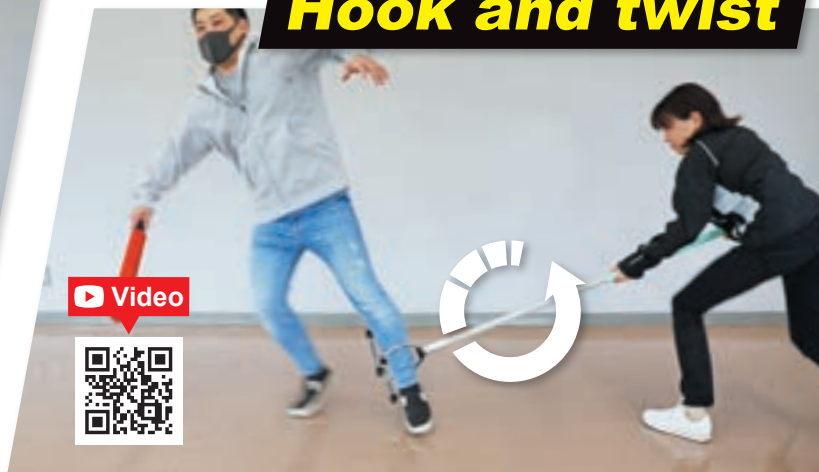

Thrust and push firmly with the head to maintain distance.

Sweep

Hook the intruder's leg or arm with the head to disrupt balance.

Hook and twist

Twisting while the head is fitted over an arm or leg creates moderate pain due to the protrusions.

During the critical window between an emergency call and police arrival, SB224 effectively limits an intruder's mobility, allowing for safe evacuation or coordinated restraint.

Watch the demo video on our official website

Our security products provide a **safe window to escape** or **allow your team to quickly restrain suspicious individuals.**

5 Key features of SB224

Approximately 950g — lightweight and compact for easy handling.

*Compared to our Sasumata models.

New multi-functional head design eliminates the weaknesses of traditional sasumata.

A cutting-edge, high-performance model that is intuitive and effective.

Self-standing design that allows placement anywhere.

Compact design for easy use even in confined spaces.

Lightweight shaft

3 Key Advantages

Multi-Functional & High-Performance

A uniquely shaped head.

Moderate pain

Easy to deliver strikes

Easy to gain control of the suspect

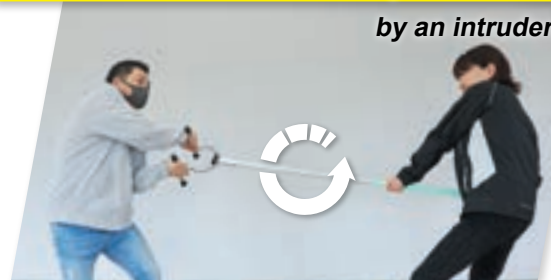

Easy to block a weapon

Easy to hook onto

The specially designed head eliminates the weaknesses of conventional sasumata, providing superior performance across diverse situations.

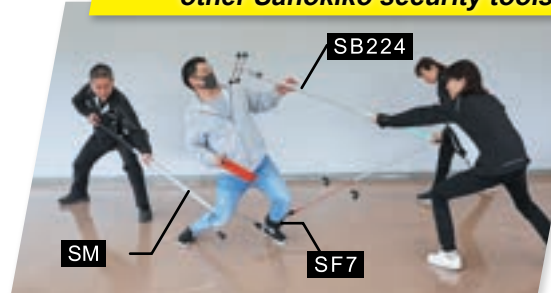

Hard to be controlled or overpowered

by an intruder.

A design that makes it hard for an intruder to take control of it. If an intruder grabs the head, the shaft can be twisted to break free easily.

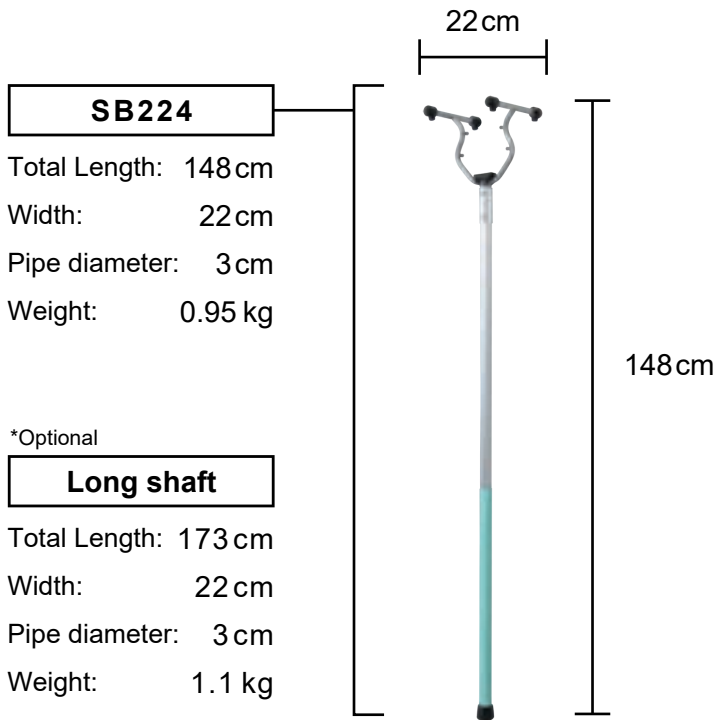

Ideal for use alongside other Sanokiko security tools.

Using it together with tools such as the SC17, SF7, or a sasumata allows you to respond to a wider range of situations.

Standard Type (Lightweight shaft)

*Length and weight are approximate.

SB224

Total Length: 148 cm
Width: 22 cm
Pipe diameter: 3 cm
Weight: 0.95 kg

*Optional

Long shaft

Total Length: 173 cm
Width: 22 cm
Pipe diameter: 3 cm
Weight: 1.1 kg

Main materials

Original irregular cross-section, high-strength aluminum alloy

Synthetic rubber (EPDM)

Stainless steel

Rigid polyurethane

etc.

Self-standing design

Placing the head downward allows the unit to stand on its own, giving you the freedom to position it anywhere for quick and easy access.
