

Restraints an intruder's arms and legs from a safe distance.

CERBERUS® security product

SF7

Lightweight

Approximately **1.6 kg**

*Award-Winning: Band

National Police Agency **Award Winner**

Compact design for easy handling even in confined spaces. Long-shaft design allows you to maintain a safe distance from intruders.

Video

Push

Wrap around

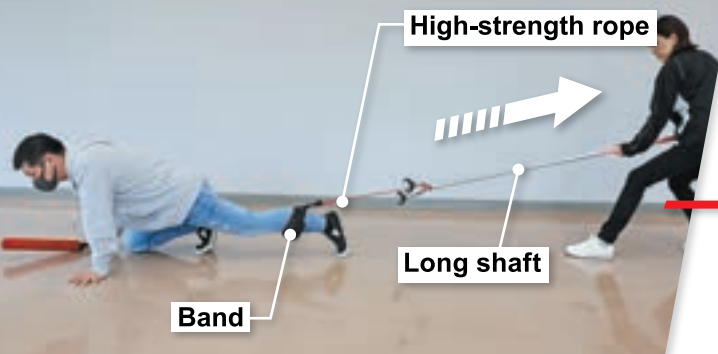

Pull

Wraps and restrains instantly with just a press against the limbs.

Create a window of opportunity

Effectively restricts movement

The band and long shaft are connected by a high-strength rope, allowing you to pull and continuously restrict the intruder's movement.

Allows for safer and more effective restraint

Team up for safety.

During the critical window between an emergency call and police arrival, SF7 effectively limits an intruder's mobility, allowing for safe evacuation or coordinated restraint.

By restricting movement, SF7 makes it easier and safer to subdue an intruder.

Watch the demo video on our official website

Our security products provide a safe window to escape or allow your team to quickly restrain suspicious individuals.

5 Key features of SF7

Instant restraint with a simple press against legs or arms.

Use safely while maintaining distance with the standard long shaft.

Weighs only approximately 1.6 kg -light and easy.

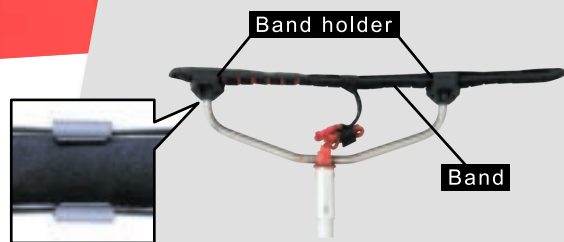

Focuses on restraining movement while reducing the risk of excessive defense.

Compact design for easy operation in limited spaces.

3 Key Advantages

Easy attachment
using the band holder

The band attaches easily to the holder for quick setup. We recommend storing it with the band pre-attached for rapid deployment.

Difficult for intruder to remove

The internal band structure and high-engagement hook-and-loop fastener make it extremely difficult for the intruder to remove once wrapped. For training purposes, it can be easily removed from the user side.

Durable and reusable

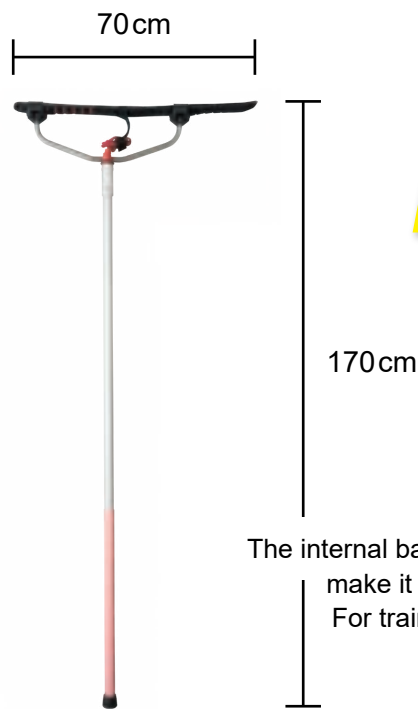

Built to withstand repeated training and real-world applications.

Standard Type (Long shaft)

*Length and weight are approximate.

SF7	
Total Length:	170 cm
Width:	70 cm
Maximum Thickness:	7 cm
Pipe diameter:	3 cm
Weight:	1.6 kg

Main materials

- High-grade stainless steel
- Original irregular cross-section, high-strength aluminum alloy
- Stainless steel
- High-strength nylon fabric
- High-engagement hook-and-loop fastener
- Silicone
- Abrasion-resistant fabric
- Stretch fabric
- High-strength rope
- etc.

Wall mounted holder

Total Length:	24 cm
Width:	4 cm
Maximum Thickness:	8 cm
Weight:	0.34 kg

(Aluminum alloy components)
